

ProCode™ PROFESSIONAL

PouchMark's full-featured coding design software, ProCode™ Professional, is included free-of-charge with every PouchMark® TTO System.

Our feature-rich, user-friendly, **Windows®-based software** enables you to easily create everything you'll need in your package coding environment. From standard **expiration dates and lot codes**, to **linear and 2-dimensional barcodes**, to **high-resolution logos and graphics**, ProCode™ does it all.

Although ProCode™ is a proprietary PouchMark® software program, multiple drivers and solutions are available to enable users to interface with their preferred coding and label design software.

A SUPERIOR LINE OF RIBBONS FOR TTO PRINTERS

FLEX PREMIUM DURABLE WAX-RESIN RIBBON

The clear winner in its class, this premium "General Purpose" TTO ribbon is your high quality, cost-effective choice for traditional flexible packaging applications. Crisp text, codes and graphics with very good smudge and scratch resistance.

FLEX ULTRA HIGH DURABILITY WAX-RESIN RIBBON

Remarkably versatile, FLEX™ ULTRA prints clear, dark images on most coated, uncoated and film substrates while providing added resistance to smudging, scratching and less friendly environments. Extra protection at an affordable price.

FLEX SUPREME EXTREME DURABILITY RESIN RIBBON

When durability is critical, and exposure to heavy contact, solvents or harsh environments is of great concern, FLEX™ SUPREME is the answer. This special resin ink formulation provides a nearly indelible image on flexible packaging film, pharma grade pouches and synthetic labels.

Our Xtend™ anti-static back-coating maximizes the life of your printhead.

WITH A VARIETY OF COLOR RIBBON INKS TO CHOOSE FROM

BUILT TO LAST.

PouchMark® brand Thermal Transfer Overprinters are so rugged and reliable, we back every sale with an unbeatable 18-Month Warranty. Our engineers insist on using only the highest-grade materials and components, and our vertical manufacturing protocol ensures the tightest compliance to specifications. The end result?

LESS DOWNTIME.
